Features and benefits

- FN 660 two-stage filters are designed for easy and fast chassis mounting.
- FN 660 filters are also available as B versions without Y-capacitors for medical applications with necessity for low leakage currents.
- All filters provide a high conducted attenuation performance, based on chokes with high saturation resistance and excellent thermal behavior.
- FN 660 filters are designed for noisy applications requiring good differential and common-mode attenuation.
- Various terminal options allow you to select the desired connection style.
- FN 660 filters are also available as single-stage filters (FN 610, FN 612 series).
- Custom-specific versions on request.

Typical applications

- Electrical and electronical equipment
- Consumer goods
- Power supplies
- Building automation
- Medical equipment
- Office automation equipment
- Datacom equipment
